## Save Both Money and Time with Health and Nature Friendly TRIP SHAVE CLUB

Get ready to leave your old razor blades to the dusty pages of history. A new era begins in Turkey and in the World...

HUMAN HEALTH and NATURE-Friendly, a wonderful razor has been invented so that you can save both time and money, so that you can put the old-fashioned shaving methods on the shelf. Let's just say that the owner of this invention is DRMED MEDİKAL TEKNOLOJİLERİ A.Ş., which has put its signature under unique and useful inventions for our country for years.

One of the company managers, Bayram Yavuz, comes up with the idea of an innovative razor blade that can be used in hospitals and travels. He was aware of the need to have a unique design and a useful structure for the realization of this idea.

This is where TRIP SHAVE CLUB started. As a result of serious work, serious thought, serious design and serious R&D studies, the self-gel razor TRIP SHAVE CLUB was produced. This unique product, which holds the title of being the world's first self-made gel razor, seems to have come to the rescue of Hospitals, Military, prisons, students and constantly traveling men and women...

### What is TRIP SHAVE CLUB ?

In TRIP SHAVE CLUB, 20 ML SHAVE GEL is stored in the handle by using the handle of the razor blade as a storage. Specially formulated SHAVE GEL, enriched with Aloe Vera, Vitamin E and essential aromas, is a wonderful product that enables beard shaving. The goal is to stop carrying the razor and gel separately. TRIP SHAVE CLUB, which is a very high quality product, is a health and nature friendly product that offers both razor blade and

shaving gel separately for a long time with its 20 ML  
GEL IN THE HAND SECTION.

The shaving gel in its reservoir prevents skin irritation  
with its beard softener feature. We can say that the  
self-gelled TRIP SHAVE CLUB razor is Turkish made and  
branded, which is the most important factor for you to  
buy TRIP SHAVE CLUB. DRMED MEDİKAL A.Ş says buy  
TRIP SHAVE CLUB with this invention. Let's prevent the  
release of AOUROSOL GAS to human health and nature.
