

**Name: The belt link**

**Type: CP-20**

**Technical parameters**

Minimum length	750 mm
Maximum length	3000 mm
Dedweight of the link	0,9-1,2 kg
Maximum travelling speed of trolleys coupled with the link	1 m/s
Maximum pulling force (with the sefty factor n=3)	20 kN

**Figure**

**Purpose**

The belt link , type CP-20 is designed to couple trolleys, type 1-604, 1-605 and 1-606 to arrange a transportation train for displacements of cable, conductor and hydraulic hose set.

Use of the belt link, type CP-20 to connect trolley protects suspension of electrical cables and conductors as well hydraulic hoses with displacement of suspended lined in pace with the progress of mining work and protects suspended lines against mechanical damage and twisting of lines.

**Additional information**

Declaration, concerning the meeting of the technical requirements, by the product.
