What Is Eco Friendly Bags?

Eco Friendly Bags are made of recycled materials such as Cotton, Canvas, linen and Jute and they are Reusable in nature.

What Are The Types Of Eco Friendly Bags

There are mainly types of Eco-Friendly Bags:

1. Cotton Bag
2. Canvas Bag
3. Jute Bag
4. Linen Bag

What Are The Types Of Eco Friendly Bags

Due to the use of recycled materials like Cotton, Canvas, linen and Jute in Environment Friendly Bags, they provide the user with a much stronger and sturdier solution than Plastic Bags.

They often have ergonomic handles and these handles allow the user to carry his/her bag with zero discomforts irrespective of the weight of the bag and it also allows the user to pick up some more stuff.

Environmental Benefits Of Eco Friendly Bags

When someone buys an Eco Friendly Bag, they contribute to a genuine cause of saving wildlife. Millions of wildlife deaths are caused each year just because of Plastic Bags.

Besides that, Plastic bags take anywhere from 15 years to 1000 years to decompose which means they have a long-lasting effect on our environment.

But on the other hand, Reusable Bags like Paper Bag, Cotton Bag, Canvas Bag or Jute Bag are made from compostable and biodegradable materials which make them 100% environmentally friendly.

Promote Your Brand Eco Friendly Way

You can get your favorite logo, quotes, symbols or images printed on them and they will be ready to be a part of your fashion collection as well as brand promotion.

Fashionable Accessory

Since we are talking about all types of Custom-Crafted Eco Friendly Cotton Bags, Canvas Bags and Jute Bags, you can use them as an accessory for your fashion.

MONARCH

CANVAS

Canvas Tote bags

Charectristics of Canvas Fabric

- It is durable, especially the thick canvas fabric type has a long-term use feature.
- It is flexible, takes shape according to usage.
- The back and front sides of this fabric type are the same.
- It has a classic look, but it can also be used for sportswear.
- Due to the ease of printing, patterned canvas types are in the majority.

JUTE

MONARCH

MONARCH

Jute Tote bags

Charectristics of Jute Fabric

- Jute is environmentally friendly and dissolves into the soil when it rots.
- Since it has a high moisture absorption feature.
- it can absorb moisture in humid environments.
- It has a strong structure for longterm usage.

MONARCH

LINEN

MONARCH

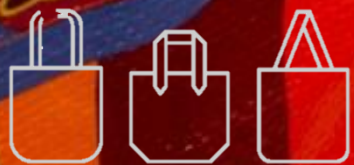

Linen Tote bags

Charectristics of Linen Fabric

- Linen is made from the flax plant and is two to three times as strong as silk or cotton.
- The long fibers of the flax plant have a natural vegetable wax coating, which creates a subtle sheen when woven together in a textile.
- The flax plant's fiber is naturally strong, soft and light; linen fabric made from these fibers is breathable and durable.
- Its natural off-white color tolerates dyes well and retains its color without fading.
- It wrinkles easily but can be pressed flat with a hot iron.
- The natural fibers of the flax make the woven textile slightly bumpy with a smooth finish

MONARCH

Woven Nonwoven PP

PP Woven

- Bags made from this material are **very flexible and easy to stretch**, and are **clear and glossy**.
- They also have good tear resistance and good moisture barrier properties
- Waterproof

PP nonwoven

PP nonwoven laminated - flexo
