PRODUCTION PROCESS

We work with our state-of-the-art machinery, from pre-press preparation preparations to printing works, with our integrated system of color and post-printing, and we deliver it to you as soon as possible. It is introduced in accordance with the transportation suitable for the transportation of the appropriate brands, which will reflect their prestige by using them in the competitive environment.

DESIGN

During the design phase by reinforcing traditional working techniques with modern equipment, customer satisfaction is ensured with designs that will create creative, innovative and original differences, taking into account criteria such as the brand's goals, corporate identity and values, and target audience profile.

BEFORE PRINT

Before the document enters the printing process, after it is checked by our graphic department, which is expert in its field, with the support of creativity and technology, your thoughts are poured into the design. After meticulous assembly and molding processes, your product is ready for printing.

OPPRESSION

The mold obtained at the end of the prepress processes is connected to the printing machine and the printing phase is started. After the ink settings are made by attaching the printing plates to the machine, it eliminates the margins of error that may occur during printing with advanced technology printing machines.

AFTER PRINT

At the stage of designing by reinforcing traditional working techniques with modern equipment, customer satisfaction is ensured with designs that will create creative and innovative unique differences, taking into account criteria such as the brand's goals, corporate identity and values, target audience profile.
