 Motors – rotating machinery

2EC

We transform and adapt motors and other equipment in order to fulfil specific requests.

About the company

Since its creation in 1892, our company has been offering a service in the broadest sense of the term.

*Bruno Focquet – CEO Focquet S.A.
& Marc Dressen – Technical & Sales Director Focquet S.A.*

As an SME operating in all sectors involving industrial electrical power equipment, we have been producing and delivering the equipment listed below without delay, for over 120 years.

Four sectors are at the heart of our activities:

- Drive units and all types of electrical motors,
- Electrical transformers,
- Power electronics and
- Industrial pumps.

Who are we?

Our activities within these different sectors revolve mainly around the buying, reconditioning, selling and renting of equipment.

Our considerable stock enables us to quickly meet your needs, with both new and second-hand equipment. Indeed, we have a wide range of both new electrical motors marked 2€C as well as second-hand motors.

In addition, our workshops allow us to provide excellent service when it comes to customising motors, thus meeting our clients' every need.

A department specialising in pumps, including their repair, was created in 2005 and employs people who are highly experienced in this field.

In March 2011, we launched a new department called "Power Electronics".

In order to meet a growing demand for equipment with variable speed, we can now offer direct current variable-speed drives of several kA in 2Q and 4Q, static variable frequency drives (low-power up to 3MW), as well as low-power and medium-power soft starters.

Activities, Products and Services

Motors products & services

- Asynchronous cage motors, low-power up to 1400kW
- Asynchronous slip-ring motors, low-power up to 630kW
- Asynchronous cage motors, medium-power up to 1250kW
- Asynchronous cage motors, IP23, low-power up to 710kW
- Direct current motors, up to 800kW

Our partners

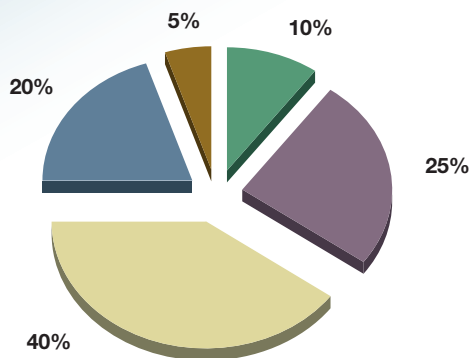

Our assets / Our challenges

The most competitive prices while ensuring:

- Quality of the motors/products
- Fast delivery
- We rely not only on our extensive experience, but also on our stock comprised of more than 15.000 motors.
- Squirrel cage asynchronous motors according to Standards IEC34-1 / EN600034-1
- IE3 and IE2 with VSD – static frequency converter

To us, your needs are our challenges!

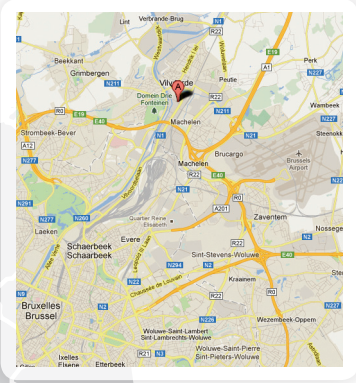

■ Industry ■ Manufacturers ■ Service ■ Resellers ■ Research departments

Sectors of activity

We sell our equipment to renowned companies located mainly in Europe.

Thanks to its expertise, our company deals with the following sectors in particular:

- Industrial sector
- Machinery manufacturers
- Service providers – Winders
- Resellers
- Research departments
