VALVE AUTOMATION

Design and production of automation systems for industrial valves

We design and produce automation systems for industrial valves and distribute them primarily to original equipment manufacturers and plant engineering companies for the process industry.

The product range extends from pneumatic and electric actuators and auxiliary equipment such as positioners, end position indicators and solenoid valves to complex automation controls and complete valve packages for open/close or modulating duty.

Optimal support for customers and users

Partnership-based support and flexible, non-bureaucratic handling of application-specific requirements are just as important for the successful implementation of projects as an excellent price/performance ratio with short-term availability.

Professional competence, short communication channels as well as customer orientation and service are for us as an independent company the core of every good partnership and guarantee optimal support for customers and users.

With our highly motivated team, we strive to maintain a consistently high level of quality in our work processes and in our product and service areas in order to meet the highest expectations of our demanding global clientele in terms of quality, cost-effectiveness and delivery readiness

Our goal is clear: We want to be the best possible partner for you!

Increasing demand for automation - we are the right partner

In times of ever-increasing demand for automation and continuous technological development, the choice of the right cooperation partners is of crucial importance. This counts especially for companies with a need of special technologies such as valve automation.

As ProtACT GmbH we have made it our business to provide our customers with customized solutions for their valve and valve automation requirements.

This includes not only technically competent and customer-oriented consulting and conceptual design, but also the correspondingly responsible implementation.

Our recipe for sustainable success?

Our customers are the focus of all our actions and we Personally vouch for what we do. Our word counts.

Automation components

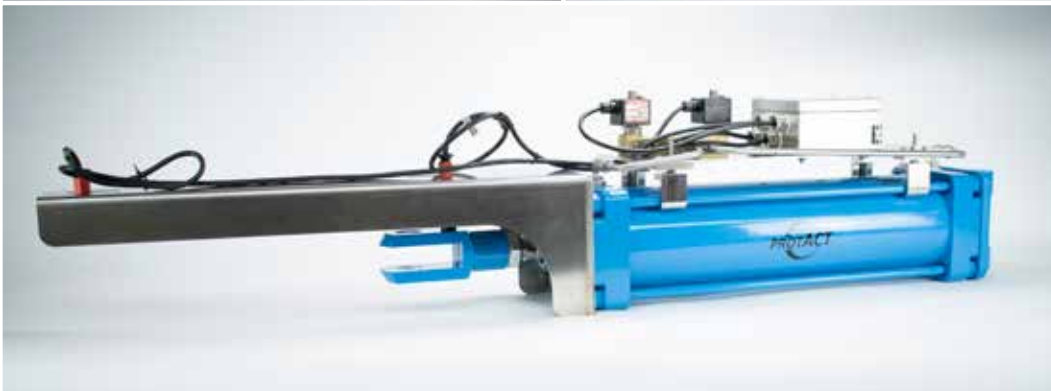

- » Pneumatic, electric and hydraulic valve actuators
- » Accessories for valve actuators
- » Control Valves
- » Compressed air preparation

Valve automation

- » Actuator systems for on/off or control valves
- » Conception of automation solutions for special applications
- » Automation service for valves

Industrial valves

- » Selection and distribution of industrial valves
- » Design and production of complete valve systems

What you can expect from us

We offer...

- ...many years of experience in the field of industrial valves and valve automation
- ...comprehensive know-how
- ...a dynamic team
- ...highest customer orientation
- ...a pragmatic solution management
- ...reliable services

Do values like follows count for you...

- ...availability of contact persons?
- ...fast reaction times?
- ...open communication?
- ...short decision-making processes?
- ...compliance with delivery dates?
- ...timely and market-driven price/performance ratio?
- ...competence of your contact persons?

For us too!

... passionate about valve automation
