About us

Our team started with a passion for personalized design and unique packaging able to protect our customers' products and at the same time make them visible on the market. At the same time, we have accumulated a vast experience over time on the paper and polyethylene packaging market, currently our company being one of the main national importers and distributors of polyethylene and paper consumables in the RETAIL and HORECA segments.

We provide packaging design, manufacturing, and delivery anywhere in Romania. Through integrated partnerships, the network we have developed quickly facilitates all stages of the creation and execution process, from the development of the concept provided by experts to the delivery of the final product.

Our Mission

- * fulfilled requests as fast as it's possible*
- * production with latest technology*
- * diversity on final product*
- * on-time feed-back*

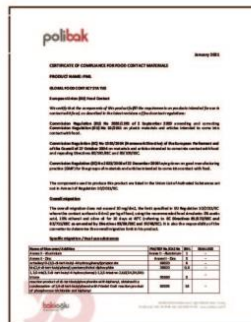

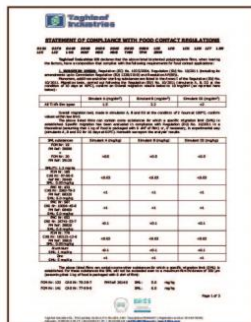

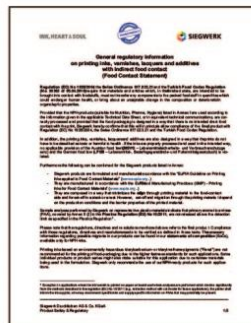

Quality

- * new horizon for our customer's QM as BRC*
- * improved skills & education of employees*
- * reaching new century technology with new researchs & investments*

Quality Management
