Series 6

High quality drinking fountains with many application possibilities. Leader in sales.

Larger dimensions that provide high stability and durability. Possibility to install the GAC filter on the inside for a more compact installation. Great hygienic protection through a special shell with anti-vandalism shield. The water jet height can be easily regulated using the high precision membrane valve. Greater hygiene since the push button is separate from the water jet. Easily regulated cold water temperature (thermostat). There is also the possibility to drink with cups for the models with cup fillers (LV models).

Accessories

There is a specific catalogue for filters.

PURIFICATION FILTERS :
It is recommended to install an activated carbon purifying filter to obtain water in optimal condition. Consult options.
