- Management review (Contract & Spec)
- Internal Quality Audit
- Quality Assurance Review

- Defect parts & Corrective actions control
- Import Inspection
- Supplier Annual Regular Audit

- Non-Conformance Identification
- Root Cause Analysis
- Process modification & Clear Statement Corrective Action Report

- High Technical Skills & Quality

Daehun is manufacturing rubber molded parts for an automotive & industrial and make constant efforts to sustain high quality level for customer satisfaction firstly.

Also, we are trying to improve our quality continuously by applying “Quality Management System” accord with ISO/TS 16949:2002 standards.

- Technical Innovation & Cost Saving Program

Daehun has the newest rubber test equipment and professional manpower in this field.

Our development/quality control team meet the quality customer requires and provide benefit to customers by cost-reduction at the same time.

- On-time Delivery & Customer Satisfaction

Daehun always fulfills on-time delivery for customer's products and offers an estimate within 24 hours.

Continuous efforts to achieve 100% customer satisfaction by specialists in this related field are our main goal & strengths and we always do our best.
