BLUEVOLUTION 82
PVC WINDOWS

DESCRIPTION

The BluEvolution profile with a construction depth of 82 mm combines outstanding energy savings and innovative sealing technology at the highest level. This makes it ideally suited as a passive house component. The use of special heat-optimized frame and sash constructions in conjunction with heat-insulating triple glazing with integrated, thermally improved edge seal ensures optimum savings on heating and energy costs.

FEATURES

Thermal insulation MD
up to $U_f = 0.92 \text{ W}/(\text{m}^2\text{K})$;
up to $U_w = 0.65 \text{ W}/(\text{m}^2\text{K})$

Sound insulation 47 dB

Safety up to RC2

Construction depth 82 mm

View height of the sash 69 mm

View height frame 73 mm

Maximum sizes standard sash:
Width up to max. 1,500 mm
Height up to max. 2,400 mm
