

## MC 42 – MC 82 – MC 120 MULTICENTER

### Multi-functional machine systems for multiple processing

Market forces create a continuous demand for new products and a multitude of variants. The manufacture of complete sub-assemblies is becoming a standard requirement of virtually every order. With the Multicenter Series, a generation of machines designed to meet this requirement is now available. The Multicenter offer an extremely high level of flexibility and productivity.

Most different processing techniques – stamping, forming, tapping, screw insertion, and many more – may be variably automatized on one basic machine. For complex manufacturing solutions, each machine is provided with two fully functional operating planes, namely a radial and a linear processing face, which may be used independently of one another or combined with one another for flexible part or sub-assembly production.

MC 120 with 1 narrow slide unit, 3 standard slide units and 2 bell-crank lever units (max. nominal force 160 kN, max. stroke 140 mm)

**BIHLER**

## Advantages of the Multicenter

- Two processing faces for radial and linear tooling concepts
- Production of complex products with simultaneous production of the individual parts
- Universally usable for longitudinal and transverse production
- Large opening in the centre for variable transverse movements
- Unrestricted access to all modules and tool stations facilitates setting up, adjustment and servicing
- High degree of availability owing to rapid tool changeovers and short resetting times
- Expansion of the machine concept and linkage with other production facilities
- High degree of re-utilization of basic machine and all modules
- Optimum safety at work provided by personnel protection and sound suppression enclosure

Multicenter MC 42

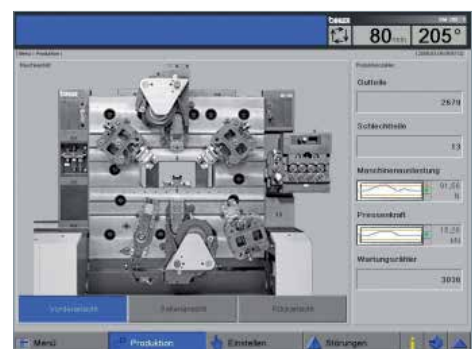

Multicenter MC 82

## Specifications

	<b>MC 42</b>	<b>MC 82</b>	<b>MC 120</b>
Stroke rate (1/min.)	continuously variable from 5 to max. 350	continuously variable from 5 to max. 250	continuously variable from 5 to max. 150
Press	nominal force 90 kN, stroke 12 mm	nominal force 300 kN, stroke 16 mm	nominal force 600 kN, stroke 20 mm nominal force 700 kN, stroke 16 mm
Slides	max. 60 kN, max. stroke 40 mm	max. 90 kN, max. stroke 95 mm	max. 160 kN, max. stroke 140 mm
Central mandrel	max. 20 kN, max. stroke 45 mm	max. 35 kN, max. stroke 80 mm	max. 35 kN, max. stroke 80 mm
Feed pitch	mech. feed: max. 240 mm, NC feed: any feed pitch	mech. feed: max. 500 mm, NC feed: any feed pitch	mech. feed: max. 350 mm, NC feed: any feed pitch
Material	max. strip width (longit.) 60 mm, (transv.) 80 mm, max. wire-Ø 4 mm	max. strip width (longit.) 80 mm, (transv.) 200 mm, max. wire-Ø 6 mm	max. strip width (longit.) 160 mm, (transv.) 320 mm, max. wire-Ø 10 mm

## Easy handling - more process safety

The Multicenter Series is equipped with the Bihler machine and process controller VC 1. The control system ensures simple handling and operation of the machines via a 15" touch display and a multifunctional keyboard. Help functions as explanations, 3D animations, photos and videos make the VC 1 exceptionally user-friendly.
