

## Product description

Applying Reinasan 24/7 Active Protection adds additional functionality to hand contact points and other hygiene-sensitive objects. This creates effective source control so that microbiology and unpleasant odours have no chance to develop. Even any stains are easily removed with the pH neutral maintenance agent available. Heavy chemicals are unnecessary, extending the service life resulting in cost savings. The system affects not only hygiene, but also behavioural change, safety and disease spread.

## Addition

The protection and care products have no negative effects on existing properties of fabrics or materials. There is a guarantee of up to 3 years for proven performance and durability. It is highly suitable for flex workstations, toilet areas, meeting rooms, appointment counters, counters, care tools and checkout systems. Thus it creates control and creates insight on hygiene management and facilitates a complete and healthy workplace.

## Partner information

Reinasan works exclusively with partners. After a company successfully completes the training course, the trained employees are certified. This enables the partner to carry out assignments 100% independently. In this way, they can distinguish themselves by offering extra service and contribute to making our planet more sustainable and circular. Also, the system offers the partner the opportunity to generate more turnover.
