

COLD-DRAWN
TUBE

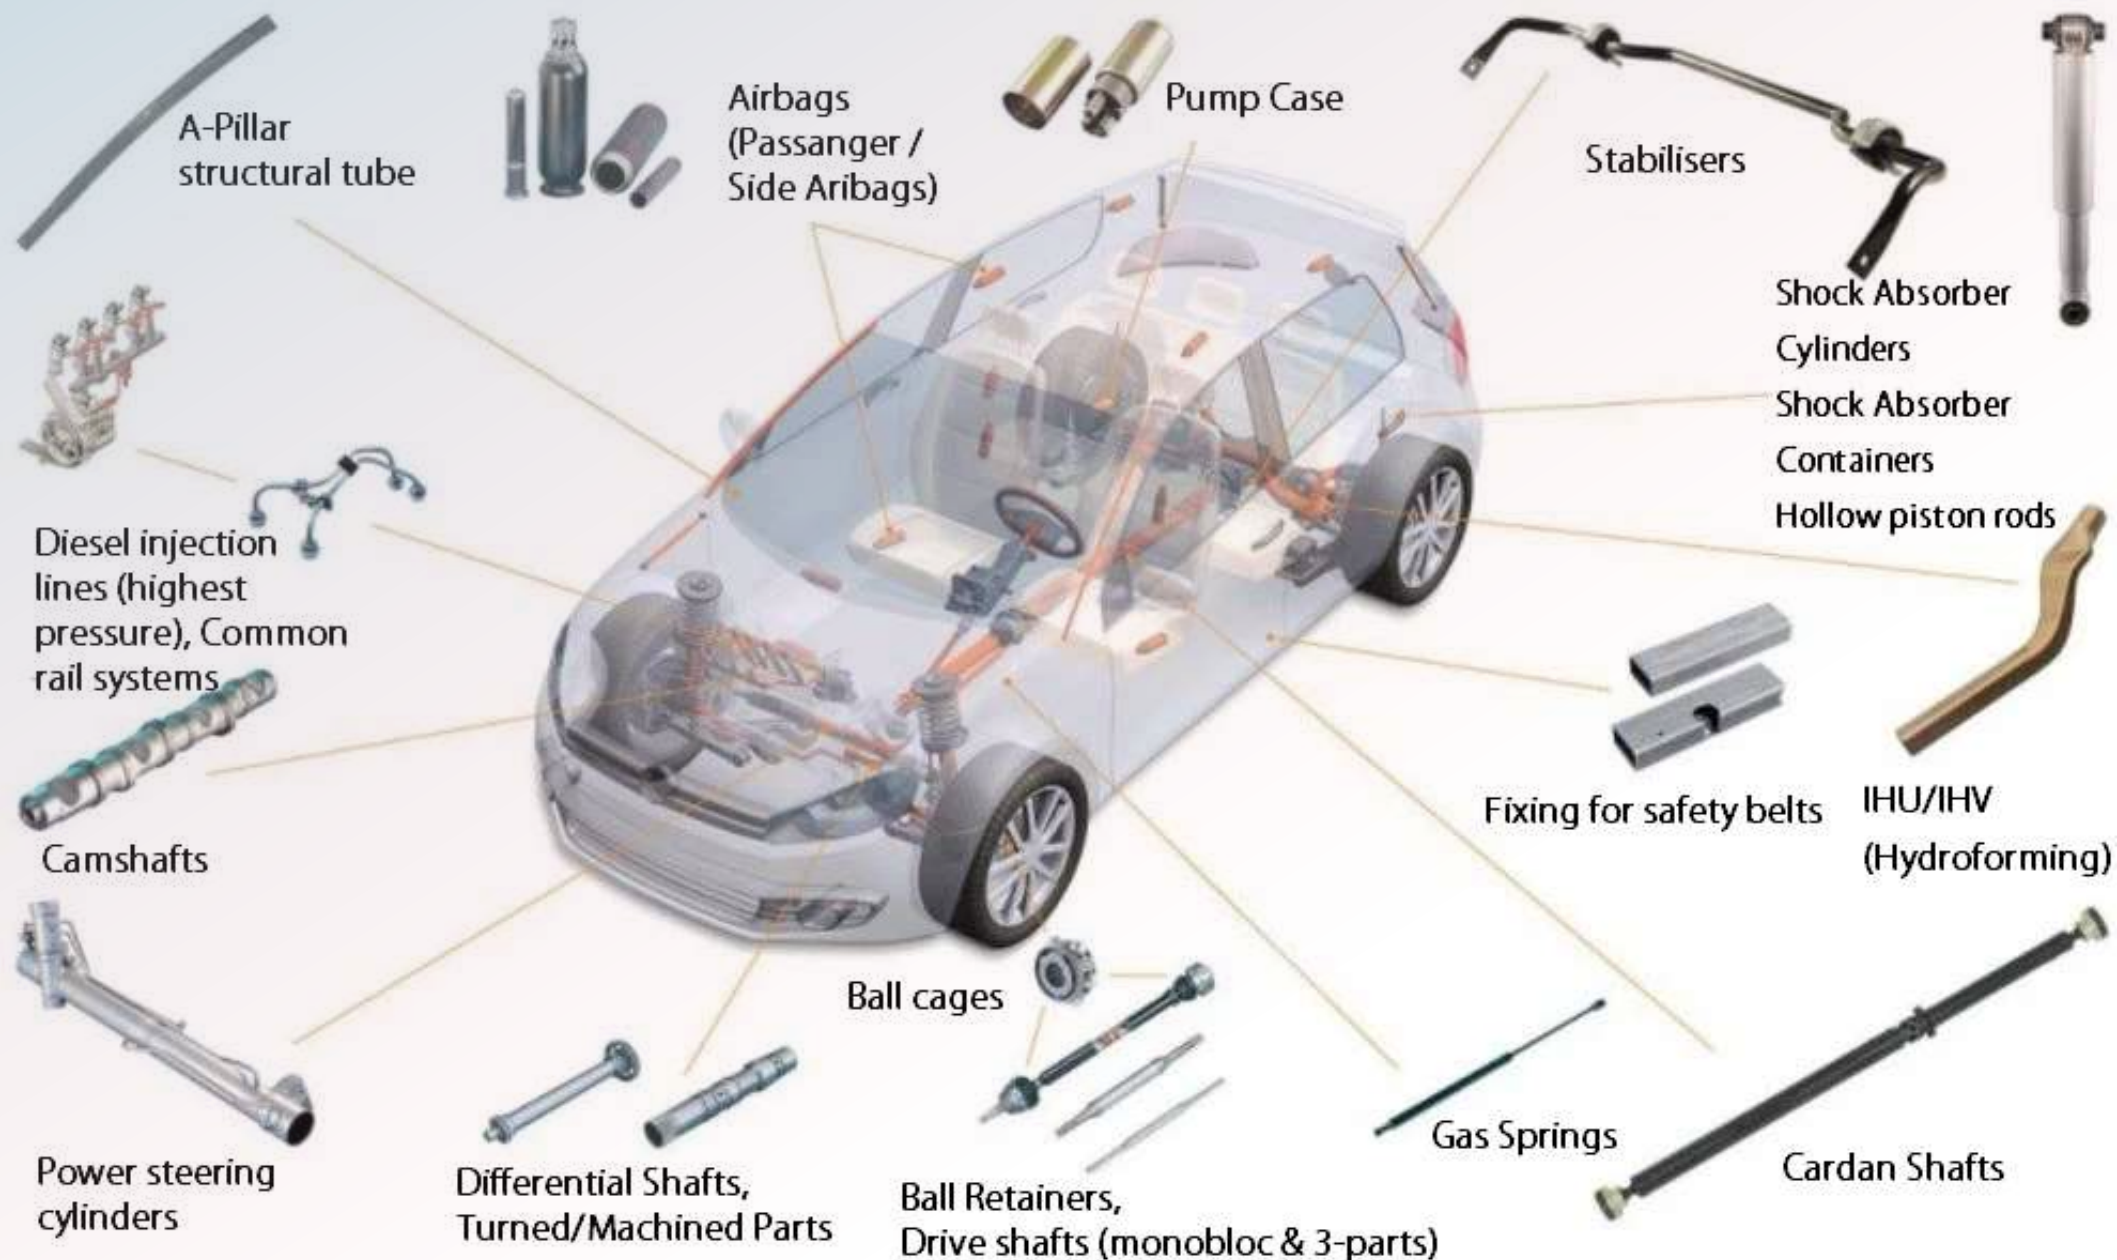

The Precision Tube is the top of the range of PAF's technical products.

Made in accordance with the [EN10305-2](#) standard, our Tube is widely used in the best precision mechanical parts factories in [Tunisia](#) and [Europe](#).

Drawn tubes can be produced to suit **specific applications**, with different steel grades, mechanical properties, reduced dimensional tolerances and final surface finish.

Automotive

Automotive Suspension , Shock absorbers , Transmission , Brake circuit tube.

Tube for heaters, boilers, heat exchangers.

Energy

Industry

Hydraulic Cylinders, Cylinder Tubes, Precision Mechanical Construction, Pneumatic Tubes, Tubular Motors.
