Wearing Method

Open the cover of the charging case, take out the earphone, put the earphone into the ear canal, and then gently swing the head, as long as the earphone does not shake, you will wear successfully.

Mode of Operation

1. Power on
(1) Open the cover of the charging case, take out the earphone, and the earphone will start automatically. The earphone's red and blue lights flickered alternately,
(2) When the earphone is off, touch the touchpad of the earphone for 3 seconds and turn it on.
The headset turns on automatically and the breathing light flashes.
2. Power off
(1) Put the headphone back into the headphone case and close the cover to charge
3. Switch between Chinese and English
(1) After the earphone connect, the host double-click to switch Chinese and English. The secondary phone is invalid. Double-click on both primary and secondary machines is valid when unconnect.

Matching connection

1. Open the cover of the charging bin and take out the earphone. The host is always flashing and the breath of the auxiliary is flashing, which means the earphone group is successful.
2. Open the Bluetooth list of the device and click Scan, and search for "GT1"
3. Click the searched "GT1" to connect
If the connection fails, put the headset back into the charging bin and cover it, then remove it and repeat the above procedure.
If bluetooth group fails, put the headset back into the charging bin and cover it, then double-click the left back ear to group.
Note: When both ears leave the normal connection distance of the device at the same time, the headset enters the state of reconnecting Bluetooth.
Failure to reconnect within 3 minutes, both ears shut down automatically.
After first connecting the device, the headset will automatically connect to the previous pairing device when it is rebooted.

	Power off	Always	Off

F&Q

1. Q: Why is there only one earphone with sound??
A: Put the two earphones back into the charging bin at the same time, close the case, and then take it out again.

2. Q: What should I do if the phone cannot connect to the headset?
A: You can delete the connected GT1 on your phone and connect it again.

3. Q: Why is there no sound when listening to songs/calls?
A: There is a setting icon on the right side of the Android phone connection record. Click to enter, uncheck and reselect the two audio options. After setting the General Accessibility function on the iPhone to enter the Audio Call mode, select Auto. If it is already automatic, change it to another option, then change it to automatic again. If it is not restored, delete the connection record and reconnect to try.

4. Q: Why is there a stutter/staccato?
A: If there are a large number of Wi-Fi devices, 4G signals, high power and other interference when using the headset, it may occur. Disconnection can be restored by changing the environment or reconnecting.

NOTE:

1. Please use a regular source charger with safety certification for charging
2. When using earphones, adjust the volume appropriately to avoid damage to hearing
3. Use the product correctly to avoid falling from high altitude or heavy extrusion
4. Children should be accompanied by adults to avoid accidental ingestion
5. Stay away from extreme environments such as high temperature or humidity
6. Do not disassemble the product
