Inks for industrial inkjet printers

Paul LEIBINGER provides the ideal inks and solvents for all its small character inkjet printers. The product line ranges from fast-drying solvent inks to inks for complex customer requirements. LEIBINGER inks and solvents meet the highest quality standards and are developed specifically for use in the LEIBINGER JET3up and JET2neo series of inkjet printers. The inks feature outstanding print and resolution quality as well as extremely high smear and abrasion resistance.

A wide selection of original LEIBINGER inks

- » Variety of colored inks and soft pigmented inks
- » Fast-drying solvent inks
- » MEK-free, ketone-free and alcohol-based inks
