DATAMAN 370 SERIES BARCODE READERS

Superior read performance for the broadest range of applications

DataMan® 370 series fixed-mount barcode readers solve challenging direct part mark (DPM) and label-based multi-code, multi-symbology applications using Cognex's latest decoding algorithms, a multi-core processor, and new integrated lighting. With twice the performance and power of conventional readers in the same class, DataMan 370 delivers superior read performance for the broadest range of applications, including:

- High-speed lines
- Difficult-to-read parts
- Small codes
- Multi-code, multi-symbology applications
- Multi-sided scan tunnels

2X read performance and power

DataMan 370 series barcode readers are optimized with patented decoding algorithms, including the new 1D/2D Auto-Discrimination algorithm, to ensure superior read rate performance for 1D and 2D codes. DataMan 370's multi-core processor enables it to run these algorithms and processes in parallel, resulting in two times the performance and power of comparable high-performance readers.

1DMax® with Hotbars® is an algorithm and technology optimized for omnidirectional 1D barcode reading, decoding up to 10X the speed of a conventional barcode reader.

2DMax® with PowerGrid® is a breakthrough algorithm and technology designed to read 2D codes with significant damage to or complete elimination of a code's finder or clocking pattern, or quiet zone.

1D/2D Auto-Discrimination is an algorithm that reduces decode times for complex multi-code, multi-symbology, label-based code applications.

Best-in-class image formation

DataMan 370's High Dynamic Range (HDR) imaging uses the latest CMOS image sensor technology to acquire single images that are 16X more detailed than conventional sensors. HDR takes advantage of the extra available image data to globally enhance image quality and contrast, resulting in greater depth-of-field, faster line speeds, and improved code handling.
Greater Depth of Field

HDR reduces over- and under-exposure, providing 20% greater depth of field.
Faster Line Speeds

HDR reduces exposure times, increasing line speed possibilities by 75%

Improved Code Handling

HDR allows DataMan 370 to adjust contrast ranges to read difficult codes with variant backgrounds that cannot be read with conventional technology.
