

BMT012 Hoodie Lace Cap

We are a company specializing in shoelace metal tips, hoodie lace metal aglets, hoodies lace cap. Our product enjoys good quality, brilliant look and reasonable price. All of our shoelace aglets approved OEKO-TEX certificate. If you are interested, please contact with us!

The traditional acetate film used on tipping machine, but when cut the film need the acetone as glue material, so it is not environmental. Due to many government buyers' request, our factory start to produce the metal tips. Our metal tips used copper to mould and approved OEKO-TEX 100 standard certificate. The U type metal shoelace tips mainly used on shoelace, the color can be coated according to customer's request. If our customers request us to carve their Logo on the tips, we also do it.

Certificate: OEKO-TEX100

Quality Control: We select the environmental copper raw material, then surface treated with environmental galvanization.
