

# PLASTRON 05 K

Version 11/18

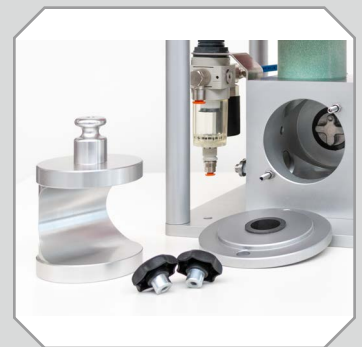

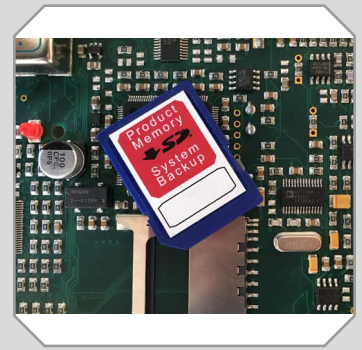

Metal separator for installation on  
Injection molding machines or extruders

- **Reliable** - in Process and Detection
- **Durable** - in Technology and Performance
- **Fast** - in Cleaning and Maintenance

## In a few words:

- Failsafe storage of all system parameters
- Digital signal processing for best detection
- Process- and condition monitoring
- Standardised system for a wide area of use
- Robust construction for maximum lifetime
- Highest precision in long-term operation
- Fast ejector for minimized material loss
- Dismantle without tools
- All components are easily accessible
