

Data Sheet

DWS 510/520 static

BIZERBA

Perfectly combined and broadly applicable: The volume and weight measurement system DWS static serves to collect all data (volume, weight, identification) for shipments by courier, express and package service providers (CEP).

More information
High performance
with a wide range of
solutions and options.

Product description

With DWS static all shipping cost-relevant data can be recorded at the touch of a button. Volume and weight are exactly determined for odd-shaped products. It consists of the proven volume measuring system VMS 510/520, a robust static scale and a barcode scanner to record code information. All parts are integrated in a sturdy mechanism. It is ready for operation after a few minutes and approved according to applicable standards. Specially designed for small and medium throughputs of up to 500 packages per hour, DWS static determines barcode, volume and weight in a single work step. The system provides all relevant data for the calculation of freight and the preparation of freight documents at the touch of a button. Also for full data recording in ERP systems verified systems such as this one are required.

Highlights

- DWS 510 static for rectangular products and DWS 520 static for odd-shaped products
- Weighing ranges: 30 kg/10 g and 60 kg/20 g legal for trade OIML R71/129
