WIPING

unsustainable
worries
away

A 100 % biodegradable
nonwoven for wipes
that is high in comfort
and sustainability.

What's in it?

Carded Airlaid Carded (CAC) technology for sustainable wipes

Our newest CAC technology makes it possible to combine three layers into a highly functional biodegradable wipe. The entire sustainable nonwoven material is produced in-line, while enabling hydro-embossing to increase cleansing power.

- Two outer layers of biodegradable carded nonwovens for soft absorption with controlled liquid or lotion release rates.
- A binder-free airlaid pulp center for maximum absorption through the carded outer layers.
- High pressured aqua jets lock the cellulosic fiber together for bonding strength without the use of chemicals.

- 1 = Carded
- 2 = Airlaid Pulp
- 3 = Carded

Benefits & characteristics

Mondi's unique CAC technology
was designed for 100 % sustainability and maximum performance
in a nonwoven substrate for wipes:

100 % sustainable raw materials

The main composition of carded cellulosic fiber + airlaid pulp + carded cellulosic fiber is both biodegradable and compostable.

Soft touch

The carded layers on the top and bottom give a comfortable feel. Different combinations of raw material can combine to enhance required haptics.

High absorbency

The combination of cellulosic outer layers and a pulp middle layer allows for defined liquid absorbency.

High-definition 3D embossing

Our high pressured aqua jet bonding treatment combines shape and functionality.

High lotion load and controlled release

The middle pulp layer enhances absorption while the carded outer layers manage liquid release based on defined requirements.

Lotion, where it belongs

The 3-layer technology provide customisable lotion management, including absorption and release.

HIGH LOTION LOAD

3 layer technology keeps the liquid or lotion in the wipe where it belongs.

CONTROLLED RELEASE

Carded outer layers allow the release of liquid or lotion based on defined requirements.

Hi, we are Mondi PCC.

For every generation: your experts in nonwovens & elastic films.

Mondi is a leading supplier of elastic and nonwoven solutions for the hygiene industry.

We offer comprehensive baby care, adult incontinence, feminine care, and nonwovens for wipes solutions that are high in performance and comfort.

With our components, babies stay relaxed, women feel secure, seniors keep their dignity and you even can just wipe away little worries.

Baby Care:

The comfort of simplicity

Explore our wide range of soft and comfortable features ideal for baby care products.

We help our customers design and produce diapers with remarkable and lasting comfort.

Feminine Care: Empowered Solutions

Our features increase comfort, and are silent when it matters most. Our films have a proven track record in stacking and machine processability, enabling an economic solution for high quality components.

Adult Incontinence:

A new form of comfort

Adult incontinence products have their own set of unique requirements. Our innovative components for briefs with ears or belts help you bring comfort and convenience you can rely on.

Nonwoven for Wipes: A new level of flexibility

Discover our highly useful, innovative and customisable solutions from mono-layer carded nonwovens and our SAC and CAC technology for a wide range of applications. The future is coming soon, as we are developing our sustainable nonwoven materials which will be 100 % biodegradable.
