

## HYBRID Pad Printing Machine

PAD PRINTING MACHINES ACCESSORIES SERVICE

Standard pad printing machine for minimum-size series production  
Ideal for variable, frequently changed data amounts  
2-color printing, cliché production integrated

## Standard Pad Printing Machines

# HYBRID Series

The future in the pad printing process lies in the integrated cliché production using laser engraving. The pad printing machine **HYBRID 90-2** combines the concept of the "hermetic" pad printing with the flexibility of the digital data for cliché production. Thanks to the software ALFALAS® Laser Suite which was specifically developed for this purpose, the cliché production takes place in the HYBRID 90-2. Automatic changeover of print motifs takes place in a matter of seconds. A multi-color print motif will be directly produced with precise register setting.

The **HYBRID 90-2** is based on the well-trying V-DUO principle with an ink/doctoring cup size Ø 90 mm.

Our in-house developed microflex cliché band plays an important role making this concept possible. It possesses a high engraving quality and mechanical stability.

The control of the **HYBRID 90-2** iTAMPOPRINT is already prepared for the use of the software iTAMPOPRINT. This offers the possibility to connect the pad printing machine for example to an ERP system in order to allow a complete data management. In addition, it is possible to process external information of camera systems, testing devices etc.

### Comparison

HYBRID – Cliché production by means of laser engraving		Production of Magnet-screen clichés	
1	Prepress	1	Prepress
2	Setup laser software	2	Creation of film
3	Cliché engraving	3	Mounting of film
4	Printing	4	Exposure
–		5	Washing out
–		6	Curing
–		7	Mounting of cliché
–		8	Adjusting of register
–		9	Printing
