About

CherryPURE® is the world’s leading tart cherry powder. It is made from 100% Montmorency tart cherries, which are grown in the area around Lake Michigan. Montmorency is a very robust cherry variety with a unique plant profile. The cherries are packed with anthocyanins and polyphenols and have a high ORAC value.

Only the nutrient-rich cherry skin is used for CherryPURE®, which is gently freeze-dried and concentrated at a 50: 1 ratio (50kg cherries for 1kg of powder). This makes CherryPURE® the most concentrated tart cherry powder on the market.

Tart cherry powder is ideal for reducing gout symptoms, increasing sports performance, and lowering inflammation markers.

Therapeutic Applications

Anti-inflammatory

- Reduces inflammatory markers
- Can decrease inflammatory-related conditions

Lowers the risk of gout attacks

- Reduces uric acid and nitric oxide levels
- Linked to less pain associated with gout attacks

Promotes healthy sleep

- Can extend sleep time
- Enhances sleep quality
- Supportive in case of insomnia

Increases sports performance

- Improves sports endurance
- Reduces muscle exhaustion and enhances recovery

Product Features

Botanical Origin	Prunus cerasus
Origin	USA (Michigan)
Bioactives	High in Anthocyanins and Flavonoids: Cyanidin, Epicatechin, Quercetin, Kaempferol etc.
Shelf life	18 - 24 months
Dosage form	Capsule, Tablet, dragee, powder
Appearance	red/ purple
Recommended serving	550 mg per day
Characteristics	50:1 concentration
Product Certifications	Kosher, Halal

Key Benefits

Arthritis

Gout (Hyperuricemia)

Inflammation and pain

Sleep

Sports Performance
