

**Greenhouse Solutions for
Better Crop Protection**

GREENHOUSE ACCESSORIES

GREENHOUSE ACCESSORIES

Trellising Rope

We provide black polypropylene rope manufactured with additives for protection against degradation due to ultraviolet rays. This kind of ropes will not degenerate for 2 to 3 years as against normal ropes degenerating in 2 to 3 months if exposed to sunlight. This has good stretching properties, hence useful for organic and protected farming. The color is also chosen black since it provides additional UV protection. Polypropylene twine are commonly used for trellising tomatoes, peppers and other vine plants.

Features

- Light to medium duty, versatile
- Forms tight, strong knots
- Resistant to abrasions and UV light
- Available in roll form
- Does not harm the crop when supported or rested on it.

Weight : 1.8Kg / 5Kg

Length : 1800m / 5000m

Film repair Tape

Greenpro film repair Tape is a single coated, 200 micron, UV stabilized, clear, polyethylene film with a high tack acrylic adhesive. Heavy-duty tape designed for interior and exterior bonding applications and is great for repairing minor tears in polyethylene greenhouse film.

Width : 2.75 inch/ 3.75 inch
Length : 25 meter

Film Support Strap

Greenpro Film Support Strap is a UV stabilized jaquard multifilament strap, helps in enhancing the service life of greenhouse films as well as in bringing the reduction in possible damages caused by winds.

Features

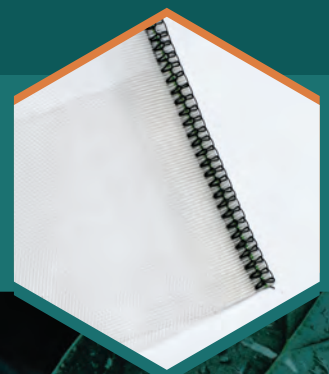

- Lightweight and easy to use
- Superior tensile strength.
- Capability to stretch
- Easily absorb shocks.
- UV Stabilized -Long life 5 years

Length : 100m

Stitching Yarn

We offer a wide range of PP/PE monofilament yarns (denier range 300-1500) for various stitching purpose.
