
40 Centigrade Water Soluble PVA Yarn

40C PVA Yarn

40 Centigrade Water Soluble PVA Yarn

40C PVA Yarn

PVA soluble yarn is a kind of soluble yarn spun from short vinylon fiber through ring spinning. It is a kind of yarn that can dissolve like salt when it is fully contacted with water has good water solubility. It can be dissolved in water of about 0-100 Centigrade according to different needs. In short, the yarn can be dissolved like salt if it is fully contacted with water.

Specification

item	PVA Yarn
Material	100%PVA
Yarn Type	Spun
Pattern	Raw
Technics	Ring Spun
Feature	Dissolved in water
Use	Sewing, Hand Knitting, Knitting, Weaving, Embroidery, Lace connection

Twist	Average
Evenness	Evenness
Yarn Count	Ne20s-Ne100s
Strength	Extra
Place of Origin	China
Temperature	20-90 centigrade
MOQ	500 kgs

Parameters

Temperature	Size(NE)
90°C	20S/1,30S/1,40S/1, 45S/1, , 60S/1, 80S/1,100S/1,110S/1
80°C	20S/1,40S/1, 45S/1,60S/1, 80S/1
60°C	40S,60S,80S
40°C	20S/1,40S/1, 60S/1, 80S/1;40S/2
20°C	20S/1, 40S/1. 50S/1,60S/1,80S/1,20S/2, 40S/2, 50S/2.
