

Product description

Applying Reinasan 24/7 Active Protection adds extra functionality to the object/product. This prevents degradation and ageing of dust, plastic and stitching, among other things. Active source control of organic and atmospheric contamination such as mould, algae and air pollution also takes place. Together with rainwater and the available pH-neutral maintenance agent, it guarantees an easy-to-clean surface, aesthetically pleasing for longer, extends its lifespan and thus saves on costs and investments. It retains the freshness and appearance like new condition. Hard-to-reach objects/parts are easy to clean.

Addition

The protection and care products have no negative effects on existing properties of fabrics or materials. It comes with a 5-year warranty for proven performance and durability. It is suitable for new and or existing materials.

Partner information

Reinasan works exclusively with partners. After a company successfully completes the training course, the trained employees are certified. This enables the partner to carry out assignments 100% independently carry out assignments. In this way, they can distinguish themselves by offering extra service and contribute to making our planet more sustainable and circular. Also, the system offers the partner the opportunity to generate more turnover.
