

DEBURRING ROLLERS FAPI-FLEX

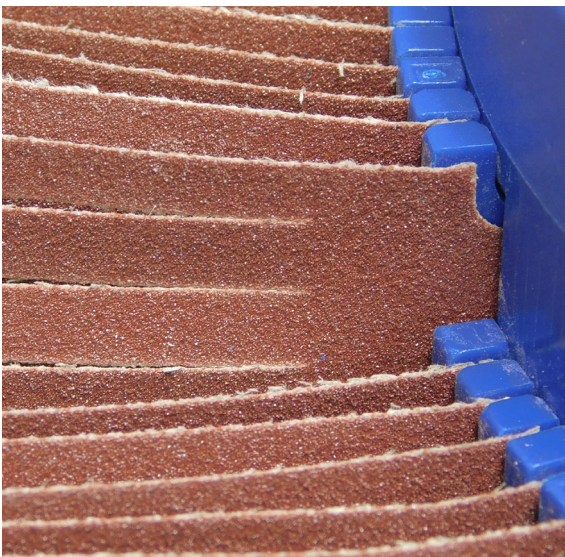

DEBURRING ROLLERS FAPI-FLEX

up to 20% higher service life

With the new facing material BROWN for our deburring rollers FAPI-FLEX we achieve up to 20% longer service life due to improved grain distribution compared with our standard rollers with the same edge rounding and surface quality!

FACING TYPE FAPI-FLEX BROWN

- ⇒ high stock removal rate and self-sharpening due to modified x-cotton fabric as base
- ⇒ corundum abrasive grain with high cutting properties in high-strength bonding
- ⇒ thus high stock removal rate during deburring

P40 - P320

(corundum abrasive grain)
für stainless steel, steel
and aluminum
