

BeneSOL PHORK

Organic Fertilizer

BeneSOL PHORK is an organic solid fertilizer on basis of pig manure. BeneSOL PHORK holds a very high phosphate level which is particularly beneficial at the start of the growing season. This results in a quick crop response and a strong effect on rooting and vegetative growth. Besides that, BeneSOL PHORK contains a high level of zinc which is particularly useful during the auxin synthesis. This is an important growth regulator. Proper fertilization with this product can prevent deficiency symptoms in crops during the growth period.

The application of this fertilizer makes for a better fertility and an enormous increase in organic matter. This leads to a better symbiose between roots and soil microbes. The pellet size of 4 mm makes it easy to spread the fertilizer.

This fertilizer is produced in compliance with EU regulations EC 1069/2009 and EU 142/2011.

Unique characteristics:

- 100% organic and ecological
- Quick growth response for rooting and vegetative growth
- Contains important nutrients and particularly high in phosphate
- High in humus and about 72% organic matter
- Improves soil structure and soil life
- Stable Value NPK: 2,5-5-1,5
- With calcium, magnesium and rich in zinc and copper
- No pathogens, weed seeds, fungi or undesirable bacteria
- Easily and accurately to spread
- Applicable in all types of soil

Product characteristics

Pellet diameter	4 mm	Organic matter	72%
Appearance	Dark brown	Humidity	9%
Dry matter	91%		

Nutrition values

Nitrogen	(N total)	2,6%
Phosphate	(P ₂ O ₅)	5,2%
Potassium	(K ₂ O)	1,5%
Magnesium	(MgO)	1,6%
Calcium	(CaO)	2,9%

Trace elements

Zinc	(Zn)	950 mg/kg
Copper	(Cu)	280 mg/kg

Dosage averages

Arable land & vegetables	1000-1500 kg /ha*
Horticulture	1500-2500 kg /ha*
Trees	3-5 kg/tree
Garden	1000-2000 kg /ha*
